We, the residents of the 8th District, wish to express our support for the East County Sector Plan of 2000 and believe that document should be used as the foundation and starting point for any Sector Plan update. We are concerned about the departure from the established Sector Plan development process and feel that the internet survey does not offer the contextual explanations and the opportunities for dialogue that were inherent in the process under which the 2000 Sector Plan was developed. Therefore, we respectfully ask that the MPC devote the resources and the time it takes to do a quality Sector Plan update and use the same process that was used in 2000.
